- Prefabs: 154 prefabs
- Textures: 449 png textures
- SourceFiles: 28 psd files
- Scene: Demo Scene V2(Cyan) (28 scene canvas+4 icons canvas)

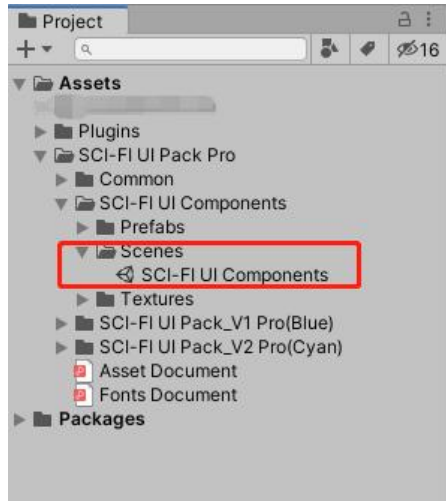

## **Use Steps:**

**(For example:SCI-FI UI Components)**

1.Open the following folder:

Project/Assets/SCI-FI UI Pack Pro/Scenes

There is 1 demo scene here. Select the scene and double-click to open it

2. Check whether the canvas resolution is  $3840 \times 2160$ . If not, set it to this resolution to display all assets correctly

3. Double click the "play" button to start running the scene, so you can see the dynamic effect of the scene.

4. If you don't want to use the default scene directly, you can find the individual prefab you want to use in 'project / assets / SCI-FI UI Pack Pro /SCI-FI UI Components /prefabs', and then drag it to your project

scene. You can freely combine and use all the elements.
